

BIOGRAPHY

Dear Readers of *Journal of Information Technology and Sciences*,

Once an American Engineer has said “Research means that you do not know but are willing to find out”. Information Technology (IT) plays a critical role in the survival and growth of business organizations. The new dimensions of research in the field of Information Technology have opened many doors for the researcher. The *Journal of Information Technology and Sciences* is committed to promote the culture of research and development in society by taking the fields like analysis, collection, classification information, manipulation, storage, retrieval of information, movement and dissemination of information, information theory and iterative design processes into consideration.

Building upon the legacy of my prominent predecessors, and supported by a newly established team of Editors, I am committed to strengthen the journal and grow it into a scholarly peer-reviewed journal with broad scope in the field of Information Technology and Sciences. Our Editorial team and I believe in the importance of a truly comprehensive approach to comprehensive and result oriented research.
